

## SAVING GRAIN A SERIOUS MATTER

Graham Urges Chamber to Prompt Action to Meet the Emergency.

Transportation of the 1920 grain crop is the most serious problem confronting the commercial organizations of Oklahoma at the present time, in the opinion of N. R. Graham, who urged the members of the board of directors of the chamber of commerce at the Friday noonday

luncheon to give serious consideration to the matter.

The grain harvested in the state last year and still stored in barns and elevators amounts to 3,250,000 bushels, Mr. Graham stated. There are 7,000,000 bushels stored in Kansas City as compared with 700,000 bushels at this time last year.

Oklahoma is more favorably situated in respect that the more northern states because its crop matures about three weeks earlier, when there is not such an enormous demand for cars.

Mr. Graham stated his intention of attending a meeting of the state board of agriculture to be held in Oklahoma City today, at the call of President Whitworth, to consider the matter of grain transportation for the coming season.
